A live demo of the world's first commercial Quantum-Safe Network-as-a-Service

A live demo of the world's first commercial Quantum-Safe Network-as-a-Service (NaaS), developed by Sparkle in collaboration with Intel, Arqit and Adtran. The Sparkle Quantum-Safe NaaS solution provides secure IPsec-based VPN connectivity between global end-points as a service that can be adopted quickly and easily by customers. At MWC Barcelona, they will demonstrate how they do this with a connection from the Intel stand to the Sparkle Metamorfosis II Data Centre in Athens over 1900km away.
