Showcasing Next-Gen Telecom Solutions from Core to Edge at MWC25

At MWC 2025, Dell and Intel are showcasing a lineup of cutting-edge innovations designed to help Communications Service Providers transform their business. Our collaboration underscores the power and versatility of telecom hardware solutions, spanning Core, Edge, and RAN, with the adaptable PowerEdge XR8000 platform leading the way. A key highlight is the demonstration of Samsung ORAN with Xeon 6 "Granite Rapids-D" on PowerEdge XR8000, delivering advanced performance for next-generation RAN deployments.

Additional demos include Ericsson Compact Core on PowerEdge R670 for 5G Core, and Nokia Cloud Mobility Manager with Intel Infrastructure Power Manager on PowerEdge R670 for 5G Core, showcasing enhanced 5G capabilities. We'll also present a suite of Edge AI solutions paired with private networks on the PowerEdge XR8000 and advanced GenAI-driven solutions with Aira Technologies and Opanga for network infrastructure.
