## Explore Intelligent Retail Solutions That Work

At the Diebold Nixdorf stand, Intel technology forms the backbone of every self-checkout and POS solution on display. Powered by the latest 14th Gen Intel® Core processors, these systems deliver unmatched performance, energy efficiency, and modular flexibility. Whether it's the DN Series® BEETLE M, the BEETLE A family, or DN Series® EASY for modular self-service solutions, Intel's hybrid architecture enables seamless transitions between traditional POS, kiosk, SCO, and back-office applications—ensuring retailers can adapt quickly to evolving customer journeys. From AI-powered shrink detection to sustainable design, Intel's innovation drives the future of retail.
