### Axiomtek Unveils New EN 61000-6-2 Certified Industrial Edge Computer for Smart Automation

Axiomtek is proud to introduce the IPC920, an EN 61000-6-2 certified industrial edge system powered by the 13<sup>th</sup> Gen Intel® Core™ processor. The IPC920 features a cable lock design to boast a robust design; in addition, its wide operating temperature range of -20°C to +60°C ensures reliable performance in challenging industrial environments. This highly adaptable industrial edge computer is primed for rapid integration through a PCIe x16 slot, catering to various applications including AI, vision inspection, objective classification, and factory automation.
