

Intelligence is Your Edge

Powered by Intel

AI Network Security, AI Physical Therapy, and Edge for AI Smart Cities

As a trusted AI innovation partner, AAEON has a deep understanding of Intel's AI and edge computing technologies. AAEON's partnership with Intel is based not only on bringing world-class products to market, but on enhancing the adoption and market utility of edge AI solutions through bilateral initiatives, shared practices, and joint goals.

Live demos of AAEON's products include:

- FWS-2290 for AI Network Security: The platform offers integrated security for applications such as UTM and VPN.
- PICO-MTU4 for AI Physical Therapy: World's smallest board equipped with Intel® Core™ Ultra platform to power advance edge computing, smart healthcare, and industrial robotics solutions.
- UPX i14 Edge for AI Smart Cities: The system handles real-time video processing from multiple peripherals while maintaining wireless connectivity.
