

Intelligence is Your Edge

Powered by Intel

Enabling an Intelligent Planet

AI-Powered Defect Detection and Edge AI Server

Advantech will showcase a series of edge computing and edge AI solutions powered by Intel's latest technologies.

The AI-Powered Defect Detection leverages integrated GPUs, M.2, and PCIe for flexible configuration and AI scalability. The Edge AI Server, an Advantech AIR-series AI server built on the Intel® Xeon® platform, enhances AI applications in computer vision, LLMs, and VLMs.

Advantech will also showcase a full lineup of embedded boards powered by Intel. Its long-term partnership with Intel enables rapid integration of the latest technologies, delivering cutting-edge solutions that accelerate edge AI application development.
