Edge AI on Intel® AI PC with CPU, GPU, and NPU

Edge AI on Intel AIPC with CPU, GPU, NPU: Run your AI models easily on any or all of Intel AIPC processing units, for the best performance and optimal power consumption!

Highlights: With OpenVINO™ middleware, AI models run seamlessly on the CPU, GPU, and/or NPU processing units of Intel AI PC, allowing the optimal choice of performance and power

An intuitive UI allows the visitor to pick CPU, GPU, or NPU to run various AI models for object recognition and segmentation - using either a pre-recorded video or live camera feed as the input.

The performance and power consumption display in real time.
