GIGAIPC

GIGAIPC industrial PCs optimize power usage while maintaining peak performance, low power, high reliability—built for the toughest environments.

GIGAIPC presents embedded solutions complying with industrial grade of anti shock and anti vibration and fan less design for AGV / AMR applications operating 24/7, 365 days a year. Numerous I/O interfaces allow for connection with cameras, sensors, and other devices.

In addition to applications for AGV / AMR, GIGAIPC applies its industrial PCs in AOI system and SCADA system, which can very accurately detect defects with only a small number of failures and collect data from ground equipment and transfer the data to cloud applications.

Partner Name

GIGAIPC CO., LTD

Solution Name

Industrial PC

Booth Location

Hall 3
Booth #3-443

embeddedworld
Exhibition&Conference
