Scalable Solutions for Modern Retail

At NRF, Pyramid Computer unveils the Polytouch® Swift 24—a sleek, modular self-service solution built on Intel® technology for modern retail. Featuring a 24-inch touch display and robust design, Swift 24 delivers speed, clarity, and reliability for 24/7 operation. Powered by Intel® processor, it supports advanced applications like self-ordering, checkout, analytics, and AI-driven services with energy efficiency and long-term stability. Easy to integrate and scalable, Swift 24 adapts to evolving retail needs without disrupting existing infrastructures. Engineered in Europe and assembled in Germany, it reflects Pyramid's commitment to precision, quality, and future-ready performance.
