

The Intel logo is displayed in white text on a blue square background in the top right corner of the page.An orange rectangular badge with the text "intel partner" in white and "Gold" in a smaller font below it.

## Solution Overview

PreciTaste's™ digital food AI management platform is an AI-inferencing solution that allows food chains operators to balance food supply against demand, maximizing labor efficiencies and reducing food waste.

The system tracks food being prepared and cooked, and monitors traffic, order forecasts, and inventory to provide real-time recommendations to crews through screens on what to cook or prepare and when. After deploying PreciTaste™, customers can expect to increase productivity, enhance customer experiences, reduce food waste, boost revenue, and scale the solution across operations.
